

Agricultural Development – Trans Hex Bloeddrift Mine, Richtersveld, application for rectification for unlawful commencement.

The agricultural development is located in the Richtersveld Local Municipality and is the first pilot phase of the agricultural development planned under the Social and Labour Plan of Trans Hex Operations Pty (Ltd.) to provide an exit strategy for the current employees of Trans Hex Operations post close down of mining operations and to improve nutrition regionally through the provision of vegetable food crops. The Mine has identified areas in the mining lease area suitable for agricultural activities that will provide sustainable employment to the communities and current employees of the Trans Hex Operations Pty (Ltd.) mining operation.

FOOTPRINT Environmental Services were appointed and successfully concluded an application for rectification in terms of Section 24G of NEMA on behalf of Trans Hex Operations Pty (Ltd).
